- Sheet assembled from independent laminated parts.
- Frame in water-repellent material with the option of a weatherstrip or rubber seal that helps to improve the hermetic closing of the door and reduces sound.
- Jambs or moldings in L-shaped water-repellent material that help to hug the moqueta or wall, achieving the total lining of the perimeter of the hole where the door will be installed.
- Surface finish of the door, frames, and trim in polypropylene, PVC, or CPL in solid or wood colors.
- American or European type lock.
- Possibility of inserts made of composite aluminum, laminated wood or acrylic in solid colors.
- Optional customer designed insert, subject to factory verification
