

- Finger joint pine perimeter wooden frame, reduces risk of kinks.
- Honeycomb or honeycomb filling.
- Filled with Sauerland tubular board core, guaranteeing acoustic insulation of 30 db and fire retardant for 15 min.
- EPS sheet or expanded polystyrene padding, guarantees acoustic reduction
- Frame in water-repellent material with the option of a weatherstrip or rubber seal that helps improve the hermetic closing of the door and reduces sound.
- Jamb or moldings in L-shaped water-repellent material that help to hug the mocheteta or wall, achieving the total lining of the perimeter of the hole where the door will be installed.
- Surface finish of the door, frames, and trim in polypropylene, PVC, or CPL in solid or wood colors.
- American or European type lock.
